Litter bin with ductile iron structure and steel bin treated with Ferrus, a protective process that guarantees high resistance to corrosion. The Ferrus treatment consists of three layers applied after shot cleaning all impurities: an electrolytic bath, an epoxy coating and a Marson polyester paint coating.

Wood slats for outdoor use treated with Lignus, a fungicide, insecticide and waterproof agent. Zinc-plated steel ring to fix the bag.

Recommended anchoring: by means of expansion bolts depending on the surface and the project.
